

LIST OF CONTENTS

NUMBER 1

- | | | |
|---|-----|--|
| V. A. Gotlib, T. Sato and A. I. Beltzer | 1 | Neural computing of effective properties of random composite materials |
| A. Winnicki, C. J. Pearce and N. Bićanić | 7 | Viscoplastic Hoffman consistency model for concrete |
| A. Thabet and D. Haldane | 21 | Three-dimensional numerical simulation of the behaviour of standard concrete test specimens when subjected to impact loading |
| Y. K. Cheung and D. Zhou | 33 | Vibration analysis of symmetrically laminated rectangular plates with intermediate line supports |
| O. O. R. Famiyesin, K. M. A. Hossain, Y. H. Chia and P. A. Slade | 43 | Numerical and analytical predictions of the limit load of rectangular two way slabs |
| Z. Q. Qian | 53 | On the evaluation of wedge corner stress intensity factors of bi-material joints with surface tractions |
| S. Kamat, M. Ganapathi and B. P. Patel | 65 | Analysis of parametrically excited laminated composite joined conical-cylindrical shells |
| K.-H. Lee and G.-J. Park | 77 | Robust optimization considering tolerances of design variables |
| Z.-Q. Qu | 87 | Accurate methods for frequency responses and their sensitivities of proportionally damped systems |
| J. A. O. Barros and J. A. Figueiras | 97 | Model for the analysis of steel fibre reinforced concrete slabs on grade |
| P. Ribeiro | 107 | The second harmonic and the validity of Duffing's equation for vibration of beams with large displacements |
| A. Côté and F. Charron | 119 | On the selection of p-version shape functions for plate vibration problems |

I Calendar

NUMBER 2

- | | | |
|---|-----|--|
| G. Soremekun, Z. Gürdal, R. T. Haftka and L. T. Watson | 131 | Composite laminate design optimization by genetic algorithm with generalized elitist selection |
| B. S. Kang, W. S. Choi and G. J. Park | 145 | Structural optimization under equivalent static loads transformed from dynamic loads based on displacement |

W. H. Tong and G. R. Liu	155	An optimization procedure for truss structures with discrete design variables and dynamic constraints
J. K. Kim, K. H. Kim and J. K. Yang	163	Thermal analysis of hydration heat in concrete structures with pipe-cooling system
H. M. Kim and T. J. Bartkowicz	173	An experimental study for damage detection using a hexagonal truss
W. Chen	183	Dynamic modeling of multi-link flexible robotic manipulators
K. Komori	197	Simulation of shearing by node separation method
D.-M. Tran	209	Component mode synthesis methods using interface modes. Application to structures with cyclic symmetry
Y. (Michael) Wang and Z. Wang	223	A time finite element method for dynamic analysis of elastic mechanisms in link coordinate systems
H. Zhu, Y. Wen and H. Iemura	231	A study on interaction control for seismic response of parallel structures
K. J. Bathe	243	The inf-sup condition and its evaluation for mixed finite element methods
	I	Calendar

NUMBER 3

J. H. Rong, Y. M. Xie and X. Y. Yang	253	An improved method for evolutionary structural optimisation against buckling
W. Cui, J. Pei and W. Zhang	265	A simple and accurate solution for calculating stresses in conical shells
O. Rand	281	Nonlinear in-plane warping deformation in elastically coupled open thin-walled beams
C. Y. Dong	293	An iterative FE-BE coupling method for elastostatics
T.-S. Lok and Q.-H. Cheng	301	Free and forced vibration of simply supported, orthotropic sandwich panel
M. T. Todinov	313	Probability distribution of fatigue life controlled by defects
M. Aleyaasin, M. Ebrahimi and R. Whalley	319	Flexural vibration of rotating shafts by frequency domain hybrid modelling

- | | | |
|--------------------------------|------------|--|
| J. Lee and P. Hajela | 333 | Application of classifier systems in improving response surface based approximations for design optimization |
| P. Krysl and Z. Bittnar | 345 | Parallel explicit finite element solid dynamics with domain decomposition and message passing: dual partitioning scalability |
| | I | Calendar |

NUMBER 4

- | | | |
|--|------------|--|
| D. G. Cavell and P. Waldron | 361 | A residual strength model for deteriorating post-tensioned concrete bridges |
| J. H. Lin, X. L. Guo, H. Zhi, W. P. Howson and F. W. Williams | 375 | Computer simulation of structural random loading identification |
| A. Carpinteri, F. Ciola and N. Pugno | 389 | Boundary element method for the strain-softening response of quasi-brittle materials in compression |
| M. T. Ahmadi, M. Izadinia and H. Bachmann | 403 | A discrete crack joint model for nonlinear dynamic analysis of concrete arch dam |
| S. McWilliam | 421 | Anti-optimisation of uncertain structures using interval analysis |
| G. D. Gounaris, V. J. Papazoglou and N. K. Anifantis | 431 | Dynamics of fractured Timoshenko beams moving in wavy fluids |
| H. W. Zhang, L. Sanavia and B. A. Schrefler | 441 | Numerical analysis of dynamic strain localisation in initially water saturated dense sand with a modified generalised plasticity model |
| M. Ghorashi and M. Daneshpazhoo | 461 | Limit analysis of variable thickness circular plates |
| | I | Calendar |

NUMBER 5

- | | | |
|---------------------------------------|------------|--|
| F. Tonon, E. Pan and B. Amadei | 469 | Green's functions and boundary element method formulation for 3D anisotropic media |
| M. Dhanasekar and Q. Z. Xiao | 483 | Plane hybrid stress element method for 3D hollow bodies of uniform thickness |
| H.-G. Kwak and D.-Y. Kim | 499 | Nonlinear analysis of RC shear walls considering tension-stiffening effect |

M. Krawczuk, A. Żak and W. Ostachowicz	519	Finite element model of plate with elasto-plastic through crack
E. M. Daya and M. Potier-Ferry	533	A numerical method for nonlinear eigenvalue problems application to vibrations of viscoelastic structures
M. Karkoub and K. Tamma	543	Modelling and μ -synthesis control of flexible manipulators
A. S. Gullerud and R. H. Dodds Jr.	553	MPI-based implementation of a PCG solver using an EBE architecture and preconditioner for implicit, 3-D finite element analysis
	I	Calendar
		NUMBER 6
Q. Meng, T. Zhang and S. Du	577	Boundary element method simulation of the size effect in particle dispersed composites
M. Tong, L. G. Tham, F. T. K. Au and P. K. K. Lee	583	Numerical modelling for temperature distribution in steel bridges
X. G. He and A. K. H. Kwan	595	Modeling dowel action of reinforcement bars for finite element analysis of concrete structures
Y. Aoyama and G. Yagawa	605	Component mode synthesis for large-scale structural eigenanalysis
S. Dey, J. J. Shirron and L. S. Couchman	617	Mid-frequency structural acoustic and vibration analysis in arbitrary, curved three-dimensional domains
Z. Cai, Y. Gu and W. Zhong	631	A new approach of computing Floquet transition matrix
F. Hashagen and R. de Borst	637	Enhancement of the Hoffman yield criterion with an anisotropic hardening model
W. Q. Chen, H. J. Ding and R. Q. Xu	653	Three-dimensional free vibration analysis of a fluid-filled piezoceramic hollow sphere
T.-T. Chung and C.-H. Chiou	665	Self-adjusted convex approximation method for structural optimization
M. Ohsaki	673	Random search method based on exact reanalysis for topology optimization of trusses with discrete cross-sectional areas
	I	Calendar
		NUMBER 7
L. Gil and A. Andreu	681	Shape and cross-section optimisation of a truss structure

K. M. Rasmussen, S. R. K. Nielsen and P. H. Kirkegaard	691	Boundary element method solution in the time domain for a moving time-dependent force
R. R. Chang	703	Optimal design of laminated composite torque wrench
S. H. Tan	715	Channel frames with semi-rigid joints
J. Petrolito and K. A. Legge	727	Nonlinear analysis of frames with curved members
R. Scotta, R. Vitaliani, A. Saetta, E. Oñate and A. Hanganu	737	A scalar damage model with a shear retention factor for the analysis of reinforced concrete structures: theory and validation
W. Glabisz	757	Stability of one-degree-of-freedom system under velocity and acceleration dependent nonconservative forces
P. C. Pandey and S. Narasimhan	769	Three-dimensional nonlinear analysis of adhesively bonded lap joints considering viscoplasticity in adhesives
	I	Calendar

NUMBER 8

L. Iannucci, R. Dechaene, M. Willows and J. Degrieck	785	A failure model for the analysis of thin woven glass composite structures under impact loadings
J.-R. Lin	801	Linear stability analysis of rotor-bearing system: couple stress fluid model
G. Yu, W. J. Mansur, J. A. M. Carrer and S. T. Lie	811	A more stable scheme for BEM/FEM coupling applied to two-dimensional elastodynamics
A. P. Zieliński and F. Frey	825	On linearization in non-linear structural finite element analysis
F. Papp, M. Iványi and K. Jármai	839	Unified object-oriented definition of thin-walled steel beam-column cross-sections
F. T. K. Au, Y. S. Cheng and Y. K. Cheung	853	Effects of random road surface roughness and long-term deflection of prestressed concrete girder and cable-stayed bridges on impact due to moving vehicles
L. Simões da Silva and A. M. Girão Coelho	873	An analytical evaluation of the response of steel joints under bending and axial force
C. I. Chu, H. T. Hua and I. C. Liao	883	Effects of three-dimensional modes on acoustic performance of reversal flow mufflers with rectangular cross-section
	I	Calendar

NUMBER 9

- | | | |
|---|-----|---|
| H. Murakami and
Y. Nishimura | 891 | Initial shape finding and modal analyses of cyclic right-cylindrical tensegrity modules |
| L. Yu and A. V. Kumar | 919 | An object-oriented modular framework for implementing the finite element method |
| J. Trevelyan and P. Wang | 929 | Interactive re-analysis in mechanical design evolution. Part I. Background and implementation |
| J. Trevelyan and P. Wang | 939 | Interactive re-analysis in mechanical design evolution. Part II. Rapid evaluation of boundary element integrals |
| M. Lazzari, A. V. Saetta and
R. V. Vitaliani | 953 | Non-linear dynamic analysis of cable-suspended structures subjected to wind actions |
| K. J. Bathe | 971 | Erratum to "The inf-sup condition and its evaluation for mixed finite element methods" [Computers and Structures 79 (2001) 243-252] |

I Calendar

NUMBER 10

- | | | |
|---|------|---|
| E. M. Austin and D. J. Inman | 973 | A C^1 finite element capable of interlaminar stress continuity |
| J. Lee and S.-E. Kim | 987 | Flexural-torsional buckling of thin-walled I-section composites |
| K. V. Williams and R. Vaziri | 997 | Application of a damage mechanics model for predicting the impact response of composite materials |
| S. C. Lee, S. K. Park and
B. H. Lee | 1013 | Development of the approximate analytical model for the stub-girder system using neural networks |
| L. Dubar, B. Hauw, A. Dubois
and J. Oudin | 1027 | Numerical identification of coating bulk behaviour in metal forming |
| G. R. Liu, X. Han and
K. Y. Lam | 1039 | An integration technique for evaluating confluent hypergeometric functions and its application to functionally graded materials |
| Y.-L. Hsu, M.-S. Hsu and
C.-T. Chen | 1049 | Interpreting results from topology optimization using density contours |
| Q.-L. Zhang,
A. Vrouwenvelder and
J. Wardenier | 1059 | Numerical simulation of train-bridge interactive dynamics |

I Calendar

NUMBER 11

- | | | |
|---|------|--|
| A. L. Smith, D. J. Mee,
W. J. T. Daniel and
T. Shimoda | 1077 | Design, modelling and analysis of a six component force balance for hypervelocity wind tunnel testing |
| D. Boffi, M. Farina and
L. Gastaldi | 1089 | On the approximation of Maxwell's eigenproblem in general 2D domains |
| M. Sekulovic and R. Salatic | 1097 | Nonlinear analysis of frames with flexible connections |
| Y. Y. Li and L. H. Yam | 1109 | Robust vibration control of uncertain systems using variable parameter feedback and model-based fuzzy strategies |
| I. Rajendran and
S. Vijayarangan | 1121 | Optimal design of a composite leaf spring using genetic algorithms |
| C. Saravanan, N. Ganesan
and V. Ramamurti | 1131 | Semianalytical finite element analysis of active constrained layer damping in cylindrical shells of revolution |

I Calendar

NUMBER 12

- | | | |
|--|------|---|
| A. Houmat | 1147 | A sector Fourier <i>p</i> -element for free vibration analysis of sectorial membranes |
| V. G. Sfakiotakis, J. P. Vaitis
and N. K. Anifantis | 1153 | Numerical simulation of conjugate spur gear action |
| Th. Bulenda and J. Knippers | 1161 | Stability of grid shells |
| S. A. Alghamdi | 1175 | Dynamic stiffness matrix and load functions of Timoshenko beam using the transport matrix |
| A. A. Cannarozzi,
F. X. Momanyi and
F. Ubertini | 1187 | A hybrid flux axisymmetric model for thermal analysis |
| S. Bulman, J. Sienz and
E. Hinton | 1203 | Comparisons between algorithms for structural topology optimization using a series of benchmark studies |

I Calendar
